## Monthly Indicators

## March 2014

Most of the country is well-positioned for a flurry of activity over the next several months. Constrained housing supply levels means buyers are eyeing new listings and inventory. Investor activity and cash purchases should be monitored, as well, along with any increases in new construction. When there's money to spend and not much to spend it on, the marketplace finds a way. And although interest rates are up from their all-time lows, borrowing costs are still remarkably affordable. It's cheaper to own than to rent in most of the country.

New Listings in the Sioux Falls region decreased 8.8 percent to 495. Pending Sales were down 36.7 percent to 231 . Inventory levels shrank 1.4 percent to 1,505 units.

Prices marched higher. The Median Sales Price increased 2.3 percent to $\$ 156,500$. Days on Market was up 41.0 percent to 108 days. Absorption rates improved as Months Supply of Homes for Sale was down 8.5 percent to 4.4 months.

Consumers are in better shape for the current financial landscape, just in time for the primary home-buying season. Along with an uptick in consumer confidence, GDP growth was revised up to 2.6 percent by the Commerce Department. Consumer spending has risen and claims for unemployment benefits have decreased. Economic health fuels housing market growth. Employed, confident people with rising incomes tend to purchase real property.

## Historical Average Sales Price

## Percent of Original List Price Received

Percentage found when dividing a property's sales price by its original list price, then taking the average for all properties sold in a given month
not accounting for seller concessions.

## Historical Percent of Original List Price Received

## Housing Affordability Index

This index measures housing affordability for the region. An index of 120 means the median household income was $120 \%$ of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.
