## Monthly Indicators

## October 2015

Transitory periods in the market are common this time of year, and after a persistent period of steady year-over-year climbs in sales metrics, recent low national numbers have not fulfilled what many predicted. But on a positive note, jobless claims have also been at low levels, coming in as the lowest number since 1973. As always, every market and situation is unique, so some numbers seen in national trends may not always line up with local markets.

New Listings in the Sioux Falls region decreased 3.7 percent to 444. Pending Sales were up 37.1 percent to 540 . Inventory levels fell 22.5 percent to 1,369 units.

Prices continued to gain traction. The Median Sales Price increased 5.5 percent to $\$ 179,250$. Days on Market was down 5.5 percent to 88 days. Sellers were encouraged as Months Supply of Homes for Sale was down 38.6 percent to 3.5 months.

Interest rates are an area to pay attention to as rate hikes are widely expected before the year ends. The Federal Reserve Bank has skipped two opportunities to raise rates this fall, but the final meeting in December will likely include a minor rate hike. Although we are headed into a slower time of year, as housing activity goes, there are still many nuggets of optimism to mine from monthly figures.
