## Monthly Indicators

## December 2017

The number of homes for sale, days on market and months of supply were all down in year-over-year comparisons in a majority of the country for the entirety of 2017, as was housing affordability. And although total sales volumes were mixed, prices were consistently up in most markets. Buyers may not benefit from higher prices, but sellers do, and there should be more listing activity by more confident sellers in 2018. At least that would be the most viable prediction for an economic landscape pointing toward improved conditions for sellers.

New Listings in the Sioux Falls region increased 18.3 percent to 252 . Pending Sales were up 16.0 percent to 406 . Inventory levels fell 11.3 percent to 1,110 units.

Prices continued to gain traction. The Median Sales Price increased 5.6 percent to $\$ 190,000$. Days on Market was down 14.7 percent to 81 days. Sellers were encouraged as Months Supply of Homes for Sale was down 15.6 percent to 2.7 months.

Unemployment rates have remained low throughout 2017, and wages have shown improvement, though not always to levels that match home price increases. Yet housing demand remained incredibly strong in 2017, even in the face of higher mortgage rates that are likely to increase further in 2018. Home building and selling professionals are both cautiously optimistic for the year ahead. Housing and economic indicators give reason for this optimism, with or without new federal tax legislation.

## Housing Affordability Index

This index measures housing affordability for the region. For example, an index of 120 means the median household income was $120 \%$ of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.
